Strengthening

Neighborhood Design and Resource Center

The Neighborhood Design and Resource Center (NDRC) provides preliminary architectural design concepts and renovation advisory services to ensure

renovation, addition and new construction of homes are compatible with and add value to Norfolk's neighborhoods. Our staff

Norfolk's

assists residents and developers in upgrading homes with modern amenities to fit today's lifestyles while preserving the integrity of neighborhood character. Many of Norfolk's homes were built

post World War II and require retrofitting. Many others are historic and architecturally significant properties that need to be appropriately renovated and preserved. Also, new home construction should complement or conform with existing neighborhood styles. The NDRC

Neighborhoods

architectural staff offers a variety of free architectural and design services to meet the needs of all homeowners in

Norfolk who seek to renovate and improve their homes.
